'WEATHER-PROOF' PERENNIALS

WEATHER PROOF PERENNIALS — Rocknoll is located 22 miles north of the Ohio River in Southwestern Ohio. We have severe cold winters often without a protecting snow blanket and hot dry summers. Temperatures range from 20 degrees below zero F. in winter to 100 degrees in the shade in summer. We have periods of heavy rainfall and periods of drought just the same as you do. Our soil while very fertile and productive is only good farm land used for growing corn before we took it over. We do not have deep black celery soil or sandy old lake bottoms to force fast growth on plants that often fail to hold up when moved to your garden soils.

ROCKNOLL'S PLANTS WILL GROW FOR YOU

ROCKNOLL GIANT LONG SPURRED COLUMBINE

This is a superb strain of giant flowered varieties in every imaginable shade and color blend to be found in columbine. The stems are all long and graceful and the flowers abundantly produced on the stems. We find the best columbines to transplant are one year old field grown plants, as these still have the vigor of their first full flowering period just ahead of them.

COLUMBINE TO COLOR NAMED VARIETIES

47c Each 3 for \$1.15 \$4.00 doz.

BARN SWALLOW—Bright blue and creamy white.
CHRYSANTHA—Soft yellow throughout.

ROCKNOLL'S

NEW HUMIDIFIED ROSE PACKAGE

After several years of experimentation we have developed an almost perfect package for handling dormant field grown roses. The bushes are dug from the field, and placed in damp, refrigerated rooms until ready for packing. Around the roots of the roses a damp packing material is tightly placed, around this a heavy water-proof paper is securely wrapped and tied. Then, the plant is dipped top first into a lukewarm wax-like solution that seals the moisture and vitality into the plant. The rose plant you receive is field fresh, full of pep and vigor and ready to go ahead at once for you in your garden.

NO MAGIC . . . JUST COMMON SENSE IN PACKING

You can see from the above description that this HUMIDIFIED ROSE PACKAGE contains no magical formulae but just plain common sense in preventing the bushes from drying out.

ORDER ROSES EARLY

For best results and to assure you receiving the variety you wish please order your roses early (before April 15th).

EVERY PLANT LABELED AND CULTURAL DIRECTIONS FURNISHED. Each package has full cultural directions thereon, as well as the name and a colored picture of the rose or roses therein.

PLANTS SURE TO GROW

As an experiment roses packed in the above manner remained fresh and viable for as long as eight weeks at ordinary room temperature, so we are sure that plants packed in this manner and shipped to you the same day will be sure to grow and prosper in your garden.
